FOR IMMEDIATE RELEASE**EISENWERK SULZAU-WERFEN (ESW) ACQUIRES MILLER CENTRIFUGAL CASTING COMPANY: SETS SIGHTS ON EXPANDING GLOBAL MARKET REACH**

CECIL, Pa. (August 4, 2009) – Miller Centrifugal Casting Company (MCC) based in Cecil, Pa., announced today that Austria-based Eisenwerk Sulzau-Werfen (ESW) has purchased MCC in order to grow its global market presence.

ESW, originally founded in 1770, is a leading producer of high quality rolls for the steel industry (hot rolling mills for flat rolled products) and currently exports to more than 50 countries. Adding significantly to ESW's marketplace position and product portfolio, MCC is North America's dominant producer of steel mill sleeves used in the production of long products (primarily structured steel sections and tubular products utilized in commercial, bridge and highway construction; as well as oil and gas exploration). MCC is also North America's number one producer of large gear blanks (used in the power generation, metal, mining and construction equipment markets).

Said MCC's President, Ian Sadler, "This acquisition reflects a strategic growth initiative enabling ESW and its wholly-owned subsidiary, MCC, to pursue new and emerging global market opportunities in the metals sector. The combination of their technological strengths, R&D capabilities and dominant market positions yields superior capacity for expansion and long-term sustainability. Additional capital investment by ESW is anticipated at MCC, as well as the creation of new jobs in the future."

Terms of the sale remaining confidential, MCC will continue operating under its current name; and the company reports there are no plans to eliminate any jobs at the Cecil-based facility, which has 47 employees.

More about MCC:

Founded in 1958, MCC (www.millercentrifugal.com) is a leading producer of high quality, vertically cast centrifugal castings. Formerly owned by founder William H. Miller and later, Acutus Gladwin Industries (AGI) of Coraopolis, Pa., the company was purchased by MCC Holdings Company, LLC in 2002. (MCC Holdings Company, LLC is owned by Birchmere Capital, LP of Wexford, Pa., and Wilder-Deem of New York, New York.) With estimated revenues of nearly \$21 million in 2008 (up from \$8 million in 2003), MCC maintains both a lean manufacturing facility and a productive, motivated workforce that has benefited from a gain sharing program launched in 2005.

The company also has unique manufacturing capabilities including a process for casting bi-metallic structural sleeves and a near-net shape casting process equipping MCC to cast and machine complex, irregular shapes, as well as concentric shapes in sizes, diameters and weights unmatched in the marketplace.

More about ESW:

ESW (www.esw.co.at), headquartered in Tenneck, Austria and originally founded in 1770, is a privately-held, ISO 9001 certified iron foundry that has a longstanding reputation for product quality. The company currently exports rolls worldwide and is dedicated to environmental and advanced R&D technologies, state-of-the-art manufacturing methods, continuous quality improvement and production-process control.
